

Rural AED Data Management of Use Policy

I, _____,
Rural AED Coordinator of _____, agree to
download all AED manufacturer software to a computer used by my
organization. Upon any use of the rural AED, the organization and AED
coordinator will be responsible to send all data (printed and electronic)
to EMSI's Regional Rural AED Coordinator within 24 hours.

The organization and Rural AED Coordinator will also be responsible to
send a printed copy of the AED event to the hospital where the patient
was transported to within 24 hours so that the use of the AED can be
included in the patient's medical record. Strict confidentiality of the
patient's personal information will be maintained during transfer of any
medical information. The organization may seek assistance from their
local EMS Agency to help with the transfer of patient information to the
proper medical personnel at the receiving hospital.

James P Husar
EMSI-Regional Rural AED Coordinator
